

The future of healthcare is **NOT** in clinical settings

The Moray region experiences many challenges relating to health service access, delivery and experience by people. The collaboration between **Glasgow School of Art & Moray Leisure Centre** will explore how a current leisure centre can be redeveloped and future focussed offering a new model of patient engagement to the Moray region and beyond.

It aims to deliver five key aspects to a simple mantra;

BREATHE | EAT | SLEEP | MOVE | GROW!

People can sustain and maintain health in a healthy building and feel supported as they experience optimised life, health and wellbeing across the lifespan.
