CONGRESS CLOSÉS – See you for 2021 in Manchester

Clinical abstract poster reception

Exhibition entrance, Arena Birmingham

Delegates are invited to meet the poster researchers on Friday 3 April from 17:30 to 18:30.

Clinical abstract oral presentations

THURSDAY 2 APRIL

Ophthalmology

CROMPTON ROOM

11:05–11:20

Efficacy of 0.02% tacrolimus in dogs with keratoconjunctivitis sicca in which topical cyclosporine was ineffective: preliminary results.

Tom Kearns

11:20–11:35

Intraocular pressure reduction in canine eyes with glaucoma treated by implanting a transcorneal aqueous drainage device.

Brett Noden

11:35–11:50

Variation in intraocular pressure in the normal canine eye between different dog breeds

David Williams

11:50–12:05

Evaluation of blink rate in the normal dog

David Williams

Exotics

CROMPTON ROOM

12:05–12:20

Successful treatment of immune-mediated haemolytic anaemia (IMHA) in a pet rabbit

Sarah Brown

12:20–12:35

Bacterial isolation and antibiotic susceptibility testing from abscess, skin, and wound samples from rabbits

Rachel Marschang

Anaesthesia

CROMPTON ROOM

14:05–14:20

Prevalence and prognostic value of elevated serum total bilirubin in septic cats and dogs

Neika Payne

14:20–14:35

Blood product transfusions in cats: a retrospective study evaluating recipient disease processes and outcome

Nadine Jones

14:35–14:50

Starvation associated refeeding syndrome in missing cats: 10 cases

Emily Whitby

14:50–15:05

Red blood cell trauma during canine blood transfusion; a comparison of two infusion methods.

Melissa White

Dermatology

CROMPTON ROOM

16:00–16:15

Clinical outcomes in 59 dogs with a history of non-resolving Malassezia otitis treated at a referral veterinary hospital.

Johann Boone

16:15–16:30

Clinical performance and tolerance of a combination of Ophytium- and Seboline-containing shampoo and mousse applications in seborrheic dogs

Mc Cadiergues

16:30–16:45

Resistance of canine Staphylococcus pseudintermedius to selected topical and systemic antimicrobials in the UK

Zoe Donovan

16:45–17:00

On the feasibility of remote diagnosis of canine dermatology conditions

Trevor Hardcastle

16:20–16:35

Canine erythematous-ceruminous otitis: clinical, microbiological, lipid and cytokine characteristics

Fabien Moog

16:35–16:50

Evaluation of biofilm forming capacity of canine otic isolates of Malassezia pachydermatis (MP)

Susan Paterson

Neurology

TELFORD ROOM

9:00–9:15

Owners and veterinary practitioners' viewpoint of the future direction of research in canine epilepsy

Gareth Jones

9:15–9:30

Retrospective analysis of the diagnostic utility of cerebrospinal fluid preserved by the addition of 10% buffered formalin and EDTA.

Ivan Montañés

9:30–9:45

Slosh simulation in a computer model of canine syringomyelia

Clare Rusbridge

9:45–10:00

Thoracolumbar intervertebral foraminal and far lateral disc extrusions in dogs: clinical signs, MRI findings and short-term outcome

Sara Silva

10:00–10:15

Suspected 3-hydroxy-3-methylglutaric aciduria (HMGA) in domestic shorthaired cats

Natalie West

Infectious diseases

TELFORD ROOM

11:05–11:20

Cutaneous and renal glomerular vasculopathy cases in emergency veterinary practices in the UK

Mariana Abreu

11:20–11:35

Leptospirosis in the East of England

Jennifer Raj

11:35–11:50

Use of an ATP bioluminescence meter to quantify and monitor practice cleanliness

Katie Whalley

11:50–12:05

Benchmarking antibiotic prescribing by individual veterinary surgeons within a practice

Martin Whitehead

Nephrology/urology

TELFORD ROOM

14:05–14:20

Renal lipids and chronic kidney disease in cats

Rebecca Alborough

14:20–14:35

The efficacy of potassium chloride in decreasing calcium oxalate relative supersaturation in dogs and cats

Esther Bijsmans

14:35–14:50

The effect of increasing levels of potassium chloride on urine specific gravity, urine volume, and relative supersaturation in dogs and cats

Esther Bijsmans

14:50–15:05

Agreement between voided urine samples and cystocentesis samples for urine protein-to-creatinine ratio (UPC) determination in cats.

Josh Kennils

15:05–15:20

Retrospective evaluation of UK dogs with detrusor-urethral dyssynergy (37 cases)

Cecilia Stilwell

Diagnostic imaging

TELFORD ROOM

15:35–15:50

Computed tomographic features and treatment of extensive intermuscular abscessation in a German shepherd dog with systemic lupus erythematosus

Emily Brand

15:50–16:05

Contrast enhancement in cervical spinal nerve roots on magnetic resonance imaging independent of a causative lesion

Nicholas Clarke

16:05–16:20

Accuracy of radiographic diagnosis of pneumoperitoneum in the dog and cat.

Rachel Marwood

16:20–16:40

Are pre-contrast CTs really necessary? A preliminary research design

Hazel Reid

FRIDAY 3 APRIL

Orthopaedics

CROMPTON ROOM

8:45–9:00

Efficacy of a single intra-articular administration of autologous platelet therapy in police working dogs with hip osteoarthritis

João Alves

9:00–9:15

Radiographic measurement of mechanical tibial joint angles in Dachshunds: what is normal?

Charlotte Banks

9:15–9:30

Comparison of accuracy of free-hand, fluoroscopically guided, and aiming device assisted drilling.

Ian Faux

9:30–9:45

Medial epicondylar fissure fracture as a complication during stabilisation of humeral intracondylar fissures

Georgia Jenkins

9:45–10:00

Computed tomographic (CT) measurement of femoral trochlear groove depth in brachycephalic dogs

Alexandra Matchwick

10:00–10:15

Apprentices becoming masters: learning curves and subsequent long-term outcomes for two surgeons performing lateral fabellar suture for cranial cruciate ligament rupture

David Mills

11:05–11:20

Locking plate fixation for canine acetabular fractures.

Francesco Piana

11:20–11:35

Pancarpal arthrodesis and antebrachial deformity correction using 3D printed osteotomy and reduction guides and a customized titanium plate in a toy breed dog.

Alba Rial

11:35–11:50

Rotation of the proximal bone fragment during tibial plateau levelling osteotomy to control severe haemorrhage from the cranial tibial artery: cadaveric experimental study.

Leonor Roses

11:50–12:05

The use of transarticular external skeletal fixation to protect the primary repair of a patellar fracture in five dogs

Mara Sprocati

12:05–12:20

Comparison of effectiveness of intramuscular amoxicillin, intravenous co-amoxiclav and intravenous cefuroxime for antibacterial prophylaxis in clean orthopaedic procedures

Millie Wilder

Feline general practice

CROMPTON ROOM

14:00–14:15

Assessment of feline blood pressure in primary care practice – The Mercury Challenge, a European survey

Andy Sparkes

14:15–14:30

The first core outcome set for cats: the most important parameters to assess in feline CKD treatment.

Hannah Doit

14:30–14:45

Is there a stress component to gastrointestinal disease in cats? A look at the behavioural and environmental risk factors.

Anna Garvey

14:45–15:00

Pilot study to investigate owner education and proficiency in recognising clinical signs of feline osteoarthritis (OA) in UK first opinion practice.

Ela Russell

Hepatology

CROMPTON ROOM

15:15–15:30

Gallbladder mucocele in the Border terrier: another manifestation of gluten intolerance in the breed?

Lucy Barker

15:30–15:45

A retrospective study assessing ultrasonographic progression of canine biliary sludge (BS) over time.

Thomas Butler

15:45–16:00

Diagnostic value of serum bile acids concentrations in dogs with hepatobiliary disease.

Jorge Pena-Ramos

16:00–16:15

Extrahepatic biliary duct obstruction caused by an helminth in a cat in the UK

Francesca Venier

Gastroenterology

CROMPTON ROOM

16:50–17:05

Protein losing enteropathy in dogs: a retrospective study of 76 cases.

Tereza Bodnarova

17:05–17:20

Evaluation of the effectiveness of psyllium husk for the management of chronic idiopathic large-bowel diarrhoea in police working dogs

Ángelo Pitães

Haematology/Immunology

CROMPTON ROOM

17:20–17:35

The importance of measurement of ionised calcium in characterisation of diseases in a referral population of dogs with polyuria and polydipsia

Sophie Broughton

17:35–17:50

Sterile Pyogranulomatous Lymphadenitis in an 8-month-old Golden Retriever with nictitans conjunctivitis as the leading sign

Marina Martin-Ambrosio

17:50–18:05

Comparison of short-term treatment of dogs with non-regenerative immune-mediated anaemia, treated with prednisolone alone or in combination with azathioprine or ciclosporin

Cecilia Stilwell

18:05–18:20

Multimodal therapies in canine primary immune mediated haemolytic anaemia (pIMHA): a descriptive study

Julia Tang

18:20–18:35

Diagnostic quality of bone marrow sampling and associated complications in dogs and cats

Glynn Woods

STS

TELFORD ROOM

8:30–8:45

Owner reported breathing scores, accelerometry and sleep disturbances in brachycephalic and control dogs

David Barker

8:45–9:00

Assessment of hair cortisol concentration as a marker of chronic stress in dogs with congenital portosystemic shunts

Alex Chan

9:00–9:15

X-Y shaped peristeeal reconstructive surgery following enucleation: a retrospective study in 16 dogs

Iro Evangelia Vlachomi trou

9:15–9:30

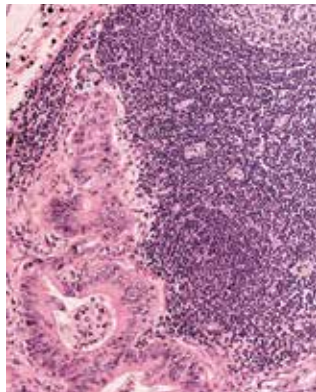

Factors affecting survival to discharge in sixty-two cats diagnosed with uroabdomen; a retrospective analysis

Samuel Hornsey

9:30–9:45

End to end anastomosis of the common bile duct and cholangioduodenostomy for treatment of extrahepatic cholangiocarcinoma in an eleven-year-old cat

Alexandra Jifcovici

9:45–10:00

The potential impact of an educational intervention tool on public perception of health problems in brachycephalic dog breeds.

Dan Kenny

10:00–10:15

Pyelotomy to remove a large nephrolith in a female Shih Tzu with bilateral nephrolithiasis and immune-mediated haemolytic anaemia with thrombocytopenia (Evans Syndrome)

Andrea Kilduff-Taylor

11:05–11:20

Factors associated with positive urine cultures in cats with subcutaneous ureteral bypass system (SUB) implantation.

Catrina Pennington

11:20–11:35

Use of the 'functional evaluation of cardiac health' (FETCH) questionnaire to determine quality of life before and after mitral valve repair surgery in dogs

Catrina Pennington

11:35–11:50

Curative minimal osteotomy for oral osteoma in 2 dogs: a case series

Jamie-Leigh Thompson

11:50–12:05

Surgical adhesiolysis to treat chronic non-specific post-operative gastrointestinal tract signs in a dog

Joep Timmermans

12:05–12:20

Impact of oesophageal feeding tube placement on outcome in dogs undergoing cholecystectomy for gall bladder mucocele

Josh Winter

Oncology

TELFORD ROOM

14:00–14:15

The toxicity profile of zoledronic acid in dogs – a single centre retrospective study

David John Brewer

14:15–14:30

Staging, treatment protocols and outcome in cats with sinonasal carcinomas treated with radiotherapy: a single centre retrospective study of 16 cases

Petros Frezoulis

14:30–14:45

The use of pleural port and intra-cavitary chemotherapy in treatment of thoracic mesothelioma in 13 dogs

Hanne Moberg

14:45–15:00

Palliative radiotherapy for oral non-lingual and non-tonsillar SCC in dogs: a retrospective study of 21 cases from two referral centres in the UK

Andrea Mosca

15:00–15:15

Prognostic factors for survival in dogs with cerebral glioma receiving primary radiotherapy: a pilot study.

Matteo Pignanelli

15:15–15:30

Objective and subjective evaluation of nausea in dogs prior to repeated chemotherapy

Nicola Read

15:30–15:45

Management of suspected canine multicentric lymphoma in UK first opinion practice.

Konstantinos Rigas

16:50–17:05

Clinical presentation of canine insulinoma: 32 Cases (2009–2019)

Daniel Ryan

17:05–17:20

Lomustine, methotrexate, and cytarabine chemotherapy as a rescue treatment for feline lymphoma

Katherine Smallwood

17:20–17:35

TRAF3 mutations in canine B-cell lymphoma

Patrick Smith

17:35–17:50

Matrical carcinomas: a case series of four dogs.

Giulia Tosi

17:50–18:05

Diagnosis of large granular lymphocyte (LGL) lymphoma via aqueocentesis in domestic cats.

Isla Trewin

18:05–18:20

Does homeopathy extend survival time in dogs with osteosarcoma: preliminary findings.

David Williams

SATURDAY 4 APRIL

Canine general practice

CROMPTON ROOM

8:30–8:45

Ingestion of unsuitable material and emesis induction at home – A survey among dog owners

Minna Suokko

8:45–9:00

Is bodyweight associated with the general health of dogs under primary veterinary care in the UK

Elizabeth Ainsworth

9:00–9:15

Chewing the fat: prevalence and risk factors for obesity in dogs under primary veterinary care in the UK

Alice Ashworth

9:15–9:30

Veterinary consultations, expenditure and healthcare issues in newly adopted Romanian rescue dogs

Parizad Baria

9:30–9:45

Field efficacy and safety of a novel oral chewable tablet containing sarolaner, moxidectin, and pyrantel against naturally acquired gastrointestinal nematode infections in dogs presented as veterinary patients in Europe

Csilla Becskei

9:45–10:00

Do brachycephalic and non-brachycephalic dogs really differ in their frequency of common health problems?

Penelope Crocker

10:00–10:15

Vulval conformation in the entire bitch and the effects of pre and post-pubertal neutering on vulva development and urogenital disease.

Jasmine Godfrey-Hunt

11:05–11:20

Hot dogs – Which dog types have highest risk of heat related illness in the UK?

Emily Hall

11:20–11:35

Hot dogs – What triggers fan the flames of heat related illness for UK dogs?

Emily Hall

11:35–11:50

Unusual presentation of ulcerative necrotizing stomatitis and rhinitis with neutrophilic-eosinophilic-granulomatous inflammation and possible vasculitis in a dog

Perrine Henry

11:50–12:05

Exploring the occurrence of hypoadrenocorticism (Addison's Disease) in UK dogs attending VetCompass primary-care practices.

Abbey Johnson

12:05–12:20

Owner-perceived adverse reactions within two days of vaccine administration in dogs.

Rachel Kinsman

12:20–12:35

What's Weighing on Your Mind? An Insight on How to Approach Canine Weight Management

Cara Loney

12:35–12:50

An easier way to manage otitis externa (OE): Efficacy and safety of a new combination of florfenicol, terbinafine and mometasone furoate (Neptra®) in a randomised positive-controlled trial.

Sandra Mensinger

14:00–14:15

Aetiology and outcome in dogs presenting with concurrent pleural and abdominal effusion.

Matthew Pack

14:15–14:30

Is extreme body size in dogs associated with differing longevity and mortality in the UK?

Camilla Pegram

14:30–14:45

Do pendulous ears predispose dogs to otitis externa?

Teresa Soares

14:45–15:00

Utility of C-reactive protein as a biomarker of remission in immune-mediated polyarthritis in dogs

Aimee Taylor

15:00–15:15

Which dogs are more at risk of leptospirosis in the UK?

Collette Taylor

15:15–15:30

Scooting bums: prevalence and risk factors for anal sac disease.

Alison Toetz

Respiratory

CROMPTON ROOM

16:50–17:05

Medical management of tracheal collapse in dogs, a retrospective study.

Katherine Clarke

17:05–17:20

Association between computed tomography findings and short-term outcome in UK dogs with pyothorax.

Aldara Eiras Diaz

Cardio

CROMPTON ROOM

17:20–17:35

Can we screen UK Dobermanns for Dilated Cardiomyopathy (DCM) with cardiac biomarker blood tests?

Joanna-Dukes-McEwan

17:35–17:50

Pulmonary Hypertension in cats: Causes and Echocardiographic Assessment

Joao Escalda

17:50–18:05

Development of atrial fibrillation and ventricular tachycardia in an adult cat with cor triatriatum sinister

Nekesa Morey

18:05–18:20

Association between neutering status and cardiac changes secondary to myxomatous mitral valve disease

Margarida Silva

Therapeutics

FARADAY ROOM

9:15–9:30

Current trends in the fluid and blood products stocked by small animal practices in the UK.

Dave Beeston

CLINICAL ABSTRACTS

Working in Practice

FARADAY ROOM

9:30–9:45

The role of veterinary practices in the temporary care of healthy stray dogs: do veterinary personnel and members of the public agree?

Louise Buckley

9:45–10:00

Euthanasia and how it affects veterinary nurses mental health

Elle Payne

10:00–10:15

Combating infection risk in veterinary practice through novel animation methods

Fraje Watson

Non clinical

FARADAY ROOM

11:05–11:20

Gender diversity in invited speakers 2010–19 and abstract presenters 2014–2019 at BSAVA Congress

Vasiliki Lantzaki

11:20–11:35

Just mistakes? Understanding mistake handling in the UK veterinary profession

Julie Gibson

11:35–11:50

The future is getting closer: machine reading of primary-care clinical records to predict future diagnoses

Imogen Schofield

Nutrition

FARADAY ROOM

11:50–12:05

Nutritionally-based improvement of cats' skin & coat health, in non-flea, non-food-induced hypersensitive dermatitis

Isa Lesponne

Behaviour & ethics

FARADAY ROOM

12:05–12:20

Frequency and Types of Communication Errors in Practice

Ely Russell

Other

FARADAY ROOM

12:20–12:35

An investigation into Nottingham SVMS students' pre-clinical EMS experiences.

Katie Wood

PetSavers

FARADAY ROOM

12:35–12:50

Photographic, cytological and MRI evaluation of the hard, soft palate and tonsils in Cavalier King Charles spaniels with Chiari-like malformation

Beth Greene

Endocrinology

FARADAY ROOM

14:00–14:15

Laboratory assessment of calcium disorders in dogs and cats

Barbara Costa

14:15–14:30

A retrospective study on hypophysectomy in feline acromegaly

Chloe Coster

14:30–14:45

Evaluation of basal cortisol testing in dogs with chronic gastrointestinal signs

Ana Fernandez Gallego

14:45–15:00

Co-morbidities associated with diabetes mellitus in Burmese cats

Andrew Fisher

15:00–15:15

Development of a novel diagnostic prediction tool for Cushing's syndrome in dogs, using primary-care electronic patient records

Imogen Schofield

Poster presentations

Exhibition entrance, Arena Birmingham

Delegates are invited to meet the poster researchers on Friday 3 April from 17:30 to 18:30.

Comparison of different clinical metrology instruments in dogs with osteoarthritis

João Alves

Sequencing of the Janus kinase 2 gene in cats with primary erythrocytosis

Emi Barker

Radiation therapy for non-resectable neuroendocrine tumour in two dogs

Simona Borgonovi

Asymptomatic reticulocytosis in a family of Bedlington Terriers

John Bowie

Gastroesophageal intussusception secondary to induction of emesis, with subsequent development of septic pericardial and pleural effusions, in a 7-month-old Boxer

Charlie Brincin

Limited dorsal myeloschisis in three cats: a distinctive form of neural tube defect

Sarah Butterfield

Ureterocele causing stranguaria and recurrent urinary tract infection in a Siberian Husky treated with ureterocelelectomy

Elliott Clark

Spinal cord clear cell meningioma in a dog

Nicholas Clarke

Perioperative analgesic management of thoracic surgery in dogs: a descriptive study of 71 cases (2015–2018)

Luis Correa

Factors associated with neuter status in 12-month-old dogs in a longitudinal study

Rosa Da Costa

Pets as therapy – impact on employee wellbeing

Clare Donovan

Epileptic seizures as unique neurological manifestation in a dog with methylmalonic aciduria without hypocobalaminemia

Despoina Douralidou

A retrospective analysis of bronchoscope guided and non-bronchoscope guided bronchoalveolar lavage for diagnosing lung disease in dogs

Samantha Evers

Effect of pre-medication drugs on cardiovascular parameters during anaesthesia and on speed of recovery of patients undergoing daily general anaesthesia for radiotherapy.

Emma Fordham

Collision tumour of two nodal metastases (apocrine adenocarcinoma and mast cell tumour) in a dog. (A case study)

Danielle Gibson

An investigation into antibiotic prescribing behaviours in small animal practice to improve antibiotic stewardship

Charlotte Griffin

Differences in the intestinal microbial composition of cats and dogs

Ronnie Gueta

Is there an association between feline morbillivirus infection and the development of cholangiohepatitis in cats?

James Hawkesby

Genetic analysis of a Siamese cat with xanthinuria

Alexandra Kehl

The effect of non-absorbent hydrophobic sand litter on urine protein-to-creatinine ratio (UPC) in cats

Josh Kennils

Computed tomography and magnetic resonance imaging findings in a dog with anal sac adenocarcinoma with vertebral and spinal cord metastasis.

Dan Kenney

Blood plasma electropherograms of reptile species commonly kept as pets

Rachel Marschang

Simple spatio-temporal gait analysis is not better than the human eye

James Miles

Tramadol and gabapentin improve peak vertical force in osteoarthritic dogs already receiving non-steroidal anti-inflammatory drugs

James Miles

Infiltrative canine haemangiosarcoma of the right ventricular free wall with pulmonary metastasis

Nekesa Morey

Tilapia skin use in the management of bilateral degloving injuries in a Lurcher.

Jane Oatley

H1-NMR-based metabolomics provides new insights into canine diabetes mellitus

Claudia Ottka

An ethical decision-making tool for veterinarians to avoid 'convenience euthanasia' of companion animals

Alice Owen

Canine infectious respiratory disease: Evidences for multiple paramyxovirus

detection associated with the disease and first identification of canine pneumovirus in Thailand

Chutchai Piewbang

Assessment of intra-operative nociception in dogs. An observational pilot study

Elliot Pye

Intranasal meningoencephalocele in a one-year-old Staffordshire Bull Terrier with unilateral destructive rhinitis

Sofia Rapastella

Investigation into possible differences in spinal tapering between Cavalier King Charles spaniels with Chiari-like malformation and those with secondary syringomyelia

Kate Rumbold

Pulmonary Adenocarcinoma: Successful long term outcome after surgical excision, chemotherapy and metastasectomy in a dog

Matthew Simpson

Primary pancreatic extraskeletal osteosarcoma in a domestic shorthair cat previously diagnosed with diabetes mellitus

Katarzyna Smiejan

A clinical investigation into long term efficacy outcomes in the management of severe canine osteoarthritis (OA) using an optimised regenerative medicine (RM) approach

Jo Miller

Owners' perception of veterinary specialists in a U.K. small animal referral hospital

David Rhys Treharne

A pilot study examining type of thyroidectomy and incidence of post-operative hypocalcaemia of 42 cats treated in UK charity practices

Saskia Travers

Topiramate as adjunctive therapy to manage post-traumatic mutilation in 3 cats

Alba Troya

Adverse reaction to topical clotrimazole therapy for canine sinonasal aspergillosis

Ben Walker

Urethral blockage in a feline patient caused by a grass seed mid-urethra, found during a perineal urethrostomy.

Kingsley Warren

Suitability of commercial human rheumatoid factor rapid tests for detection of rheumatoid factors in dog serum

Corinna Weber

Training methods and reported problem behaviours in a cohort of dogs.

Joshua Woodward

Neoplastic Pericardial Effusion and Widespread Intrathoracic Metastasis in a Dog with a High-Grade Cutaneous Mast Cell Tumour: First Description

Andy Yale

Nurse Case Reports

EXECUTIVE ROOM 2

10:00–10:05

Introduction

10:05–10:20

Obstructive fibrinous tracheal pseudomembrane in a brachycephalic dog

James Colver

10:20–10:35

Nursing care of a cat with a traumatic cat-bite induced cerebral abscess

Emily Hooper

10:35–10:50

Excess fetal membrane fluid [canine maternal hydrops]

Kathryne Wrigley

10:50–11:05

Nursing a 2 month old puppy with congenital lobar emphysema

Abi Holder

11:05–11:20

Break

11:20–11:35

Little puppy + big op = even bigger considerations

Claire Carr

11:35–11:50

Anaesthetic approach for magnetic resonance imaging in a dog with suspected increased intracranial pressure

Ana Costa

11:50–12:05

Medicinal leeches: an alternative method of phlebotomy

Emma Murphy

12:05–12:20

Canine distemper encephalitis: the implications of foreign adoption

Kerrie Morrison

12:20–12:30

Award prize/ judges' feedback
